

Windows Artifact Analysis: Evidence of...

File Download

<h3>Open/Save MRU</h3> <p>Description: In the simplest terms, this key tracks files that have been opened or saved within a Windows shell dialog box. This happens to be a big data set, not only including web browsers like Internet Explorer and Firefox, but also a majority of commonly used applications.</p> <p>Location: <u>XP</u> NTUSER.DAT\Software\Microsoft\Windows\CurrentVersion\Explorer\ComDlg32\OpenSaveMRU</p> <p><u>Win7/8/10</u> NTUSER.DAT\Software\Microsoft\Windows\CurrentVersion\Explorer\ComDlg32\OpenSavePIDMRU</p> <p>Interpretation:</p> <ul style="list-style-type: none"> • The “*” key – This subkey tracks the most recent files of any extension input in an OpenSave dialog • “???” (Three letter extension) – This subkey stores file info from the OpenSave dialog by specific extension 	<h3>E-mail Attachments</h3> <p>Description: The e-mail industry estimates that 80% of e-mail data is stored via attachments. E-mail standards only allow text. Attachments must be encoded with MIME/ base64 format.</p> <p>Location: <u>Outlook</u> <u>XP</u> %USERPROFILE%\Local Settings\ApplicationData\Microsoft\Outlook</p> <p><u>Win7/8/10</u> %USERPROFILE%\AppData\Local\Microsoft\Outlook</p> <p>Interpretation: MS Outlook data files found in these locations include OST and PST files. One should also check the OLK and Content.Outlook folder, which might roam depending on the specific version of Outlook used. For more information on where to find the OLK folder this link has a handy chart:</p> <p>http://www.hancockcomputertech.com/blog/2010/01/06/find-the-microsoft-outlooktemporary-olk-folder</p>	<h3>Skype History</h3> <p>Description:</p> <ul style="list-style-type: none"> • Skype history keeps a log of chat sessions and files transferred from one machine to another • This is turned on by default in Skype installations <p>Location: <u>XP</u> C:\Documents and Settings\<username>\Application\Skype\<skype-name></p> <p><u>Win7/8/10</u> C:\%USERPROFILE%\AppData\Roaming\Skype\<skype-name></p> <p>Interpretation: Each entry will have a date/time value and a Skype username associated with the action</p>
<h3>Browser Artifacts</h3> <p>Description: Not directly related to “File Download”. Details stored for each local user account. Records number of times visited (frequency).</p> <p>Location: <u>Internet Explorer:</u></p> <ul style="list-style-type: none"> • <u>IE8-9</u> %USERPROFILE%\AppData\Roaming\Microsoft\Windows\IEDownloadHistory\index.dat • <u>IE10-11</u> %USERPROFILE%\AppData\Local\Microsoft\Windows\WebCache\WebCacheV*.dat <p><u>Firefox:</u></p> <ul style="list-style-type: none"> • <u>v3-25</u> %userprofile%\AppData\Roaming\Mozilla\Firefox\Profiles\<random text>.default\downloads.sqlite • <u>v26+</u> %userprofile%\AppData\Roaming\Mozilla\Firefox\Profiles\<random text>.default\places.sqliteTable:moz_annos <p><u>Chrome:</u></p> <ul style="list-style-type: none"> • <u>Win7/8/10</u> %USERPROFILE%\AppData\Local\Google\Chrome\UserData\Default\History <p>Interpretation: Many sites in history will list the files that were opened from remote sites and downloaded to the local system. History will record the access to the file on the website that was accessed via a link.</p>	<h3>Downloads</h3> <p>Description: Firefox and IE has a built-in download manager application which keeps a history of every file downloaded by the user. This browser artifact can provide excellent information about what sites a user has been visiting and what kinds of files they have been downloading from them.</p> <p>Location: <u>Firefox:</u></p> <ul style="list-style-type: none"> • <u>XP</u> %userprofile%\Application Data\Mozilla\Firefox\Profiles\<random text>.default\downloads.sqlite • <u>Win7/8/10</u> %userprofile%\AppData\Roaming\Mozilla\Firefox\Profiles\<random text>.default\downloads.sqlite <p><u>Internet Explorer:</u></p> <ul style="list-style-type: none"> • <u>IE8-9</u> %USERPROFILE%\AppData\Roaming\Microsoft\Windows\IEDownloadHistory\ • <u>IE10-11</u> %USERPROFILE%\AppData\Local\Microsoft\Windows\WebCache\WebCacheV*.dat <p>Interpretation: <i>Downloads will include:</i></p> <ul style="list-style-type: none"> • Filename, Size, and Type • Download from and Referring Page • File Save Location • Application Used to Open File • Download Start and End Times 	<h3>ADS Zone.Identifier</h3> <p>Description: Starting with XP SP2 when files are downloaded from the “Internet Zone” via a browser to a NTFS volume, an alternate data stream is added to the file. The alternate data stream is named “Zone.Identifier.”</p> <p>Interpretation: Files with an ADS Zone.Identifier and contains ZoneID=3 were downloaded from the Internet</p> <ul style="list-style-type: none"> • URLZONE_TRUSTED = ZoneID = 2 • URLZONE_INTERNET = ZoneID = 3 • URLZONE_UNTRUSTED = ZoneID = 4

Windows Artifact Analysis: Evidence of... UserAssist

<h2>UserAssist</h2> <p>Description: GUI-based programs launched from the desktop are tracked in the launcher on a Windows System.</p> <p>Location: <u>NTUSER.DAT HIVE</u> NTUSER.DAT\Software\Microsoft\Windows\CurrentVersion\Explorer\UserAssist\{GUID}\Count</p> <p>Interpretation: All values are ROT-13 Encoded <ul style="list-style-type: none"> • GUID for XP - 75048700 Active Desktop • GUID for Win7/8/10 - CEBFF5CD Executable File Execution - F4E57C4B Shortcut File Execution </p> <h2>BAM/DAM</h2> <p>Description: Windows Background Activity Moderator (BAM)</p> <p>Location: <u>Win10</u> SYSTEM\CurrentControlSet\Services\bam\UserSettings\{SID} SYSTEM\CurrentControlSet\Services\dam\UserSettings\{SID}</p> <p>Investigative Notes Provides full path of the executable file that was run on the system and last execution date/time</p>	<h2>AppCompatCache</h2> <p>Description: <ul style="list-style-type: none"> • Windows Application Compatibility Database is used by Windows to identify possible application compatibility challenges with executables. • Tracks the executables file name, file size, last modified time, and in Windows XP the last update time </p> <p>Location: <u>XP</u> SYSTEM\CurrentControlSet\Control\SessionManager\AppCompatibility <u>Win7/8/10</u> SYSTEM\CurrentControlSet\Control\SessionManager\AppCompatCache</p> <p>Interpretation: Any executable run on the Windows system could be found in this key. You can use this key to identify systems that specific malware was executed on. In addition, based on the interpretation of the timebased data you might be able to determine the last time of execution or activity on the system. <ul style="list-style-type: none"> • Windows XP contains at most 96 entries - LastUpdateTime is updated when the files are executed • Windows 7 contains at most 1,024 entries - LastUpdateTime does not exist on Win7 systems </p>	<h2>RunMRU Start->Run</h2> <p>Description: Whenever someone does a Start -> Run command, it will log the entry for the command they executed.</p> <p>Location: <u>NTUSER.DAT HIVE</u> NTUSER.DAT\Software\Microsoft\Windows\CurrentVersion\Explorer\RunMRU</p> <p>Interpretation: The order in which the commands are executed is listed in the RunMRU list value. The letters represent the order in which the commands were executed.</p> <h2>RecentApps</h2> <p>Description: Program execution launched on the Win10 system are tracked in the RecentApps key</p> <p>Location: <u>Win10</u> NTUSER.DAT\Software\Microsoft\Windows\CurrentVersion\Search\RecentApps</p> <p>Interpretation: Each GUID key points to a recent application. AppID = Name of Application LastAccessTime = Last execution time in UTC LaunchCount = Number of times executed</p>
<h2>Last-Visited MRU</h2> <p>Description: Tracks the specific executable used by an application to open the files documented in the OpenSaveMRU key. In addition, each value also tracks the directory location for the last file that was accessed by that application.</p> <p>Example: Notepad.exe was last run using the C:\%USERPROFILE%\Desktop folder</p> <p>Location: <u>XP</u> NTUSER.DAT\Software\Microsoft\Windows\CurrentVersion\Explorer\ComDlg32\LastVisitedMRU <u>Win7/8/10</u> NTUSER.DAT\Software\Microsoft\Windows\CurrentVersion\Explorer\ComDlg32\LastVisitedPidlMRU</p> <p>Interpretation: Tracks the application executables used to open files in OpenSaveMRU and the last file path used.</p>	<h2>Jump Lists</h2> <p>Description: <ul style="list-style-type: none"> • The Windows 7 task bar (Jump List) is engineered to allow users to "jump" or access items they have frequently or recently used quickly and easily. This functionality cannot only include recent media files; it must also include recent tasks. • The data stored in the AutomaticDestinations folder will each have a unique file prepended with the AppID of the associated application. </p> <p>Location: <u>Win7/8/10</u> C:\%USERPROFILE%\AppData\Roaming\Microsoft\Windows\Recent\AutomaticDestinations</p> <p>Interpretation: <ul style="list-style-type: none"> • First time of execution of application. - Creation Time = First time item added to the AppID file. • Last time of execution of application w/file open. - Modification Time = Last time item added to the AppID file. • List of Jump List IDs -> http://www.forensicswiki.org/wiki/List_of_Jump_List_IDs </p>	<h2>Prefetch</h2> <p>Description: <ul style="list-style-type: none"> • Increases performance of a system by pre-loading code pages of commonly used applications. Cache Manager monitors all files and directories referenced for each application or process and maps them into a .pf file. Utilized to know an application was executed on a system. • Limited to 128 files on XP and Win7 • Limited to 1024 files on Win8 • (exename)-(hash).pf </p> <p>Location: <u>WinXP/7/8/10</u> C:\Windows\Prefetch</p> <p>Interpretation: <ul style="list-style-type: none"> • Each .pf will include last time of execution, number of times run, and device and file handles used by the program • Date/Time file by that name and path was first executed - Creation Date of .pf file (-10 seconds) • Date/Time file by that name and path was last executed - Embedded last execution time of .pf file - Last modification date of .pf file (-10 seconds) - Win8-10 will contain last 8 times of execution </p>
<h2>Amacache.hve/RecentFileCache.bcf</h2> <p>Description: ProgramDataUpdater (a task associated with the Application Experience Service) uses the registry file RecentFileCache.bcf to store data during process creation</p> <p>Location: <u>Win7/8/10</u> C:\Windows\AppCompat\Programs\Amcache.hve (Windows 7/8/10) <u>Win7</u> C:\Windows\AppCompat\Programs\RecentFileCache.bcf</p> <p>Interpretation: <ul style="list-style-type: none"> • RecentFileCache.bcf – Executable PATH and FILENAME and the program is probably new to the system • The program executed on the system since the last ProgramDataUpdater task has been run • Amcache.hve – Keys = Amcache.hve\RootFile\{Volume GUID}\##### • Entry for every executable run, full path information, File's \$StandardInfo Last Modification Time, and Disk volume the executable was run from • First Run Time = Last Modification Time of Key • SHA1 hash of executable also contained in the key </p>		

Windows Artifact Analysis: Evidence of...

File/Folder Opening

<p>Open/Save MRU</p> <p>Description: In the simplest terms, this key tracks files that have been opened or saved within a Windows shell dialog box. This happens to be a big data set, not only including web browsers like Internet Explorer and Firefox, but also a majority of commonly used applications.</p> <p>Location: <u>XP</u> NTUSER.DAT\Software\Microsoft\Windows\CurrentVersion\Explorer\ComDlg32\OpenSaveMRU <u>Win7/8/10</u> NTUSER.DAT\Software\Microsoft\Windows\CurrentVersion\Explorer\ComDlg32\OpenSavePIDMRU</p> <p>Interpretation:</p> <ul style="list-style-type: none"> • The “*” key – This subkey tracks the most recent files of any extension input in an OpenSave dialog • .??? (Three letter extension) – This subkey stores file info from the OpenSave dialog by specific extension 	<p>Shortcut (LNK) Files</p> <p>Description: • Shortcut Files automatically created by Windows - Recent Items - Opening local and remote data files and documents will generate a shortcut file (.lnk)</p> <p>Location: <u>XP</u> • C:\%USERPROFILE%\Recent <u>Win7/8/10</u> • C:\%USERPROFILE%\AppData\Roaming\Microsoft\Windows\Recent\ • C:\%USERPROFILE%\AppData\Roaming\Microsoft\Office\Recent\ Note these are primary locations of LNK files. They can also be found in other locations.</p> <p>Interpretation:</p> <ul style="list-style-type: none"> • Date/Time file of that name was first opened - Creation Date of Shortcut (LNK) File - Date/Time file of that name was last opened - Last Modification Date of Shortcut (LNK) File • LNKTarget File (Internal LNK File Information) Data: - Modified, Access, and Creation times of the target file - Volume Information (Name, Type, Serial Number) - Network Share information - Original Location - Name of System 	<p>Recent Files</p> <p>Description: Registry Key that will track the last files and folders opened and is used to populate data in “Recent” menus of the Start menu.</p> <p>Location: <u>NTUSER.DAT</u> NTUSER.DAT\Software\Microsoft\Windows\CurrentVersion\Explorer\RecentDocs</p> <p>Interpretation:</p> <ul style="list-style-type: none"> • RecentDocs – Overall key will track the overall order of the last 150 files or folders opened. MRU list will keep track of the temporal order in which each file/ folder was opened. The last entry and modification time of this key will be the time and location the last file of a specific extension was opened. • .??? – This subkey stores the last files with a specific extension that were opened. MRU list will keep track of the temporal order in which each file was opened. The last entry and modification time of this key will be the time when and location where the last file of a specific extension was opened. • Folder – This subkey stores the last folders that were opened. MRU list will keep track of the temporal order in which each folder was opened. The last entry and modification time of this key will be the time and location of the last folder opened.
<p>IE Edge file://</p> <p>Description: • A little known fact about the IE History is that the information stored in the history files is not just related to Internet browsing. The history also records local, removable, and remote (via network shares) file access, giving us an excellent means for determining which files and applications were accessed on the system, day by day.</p> <p>Location: <u>Internet Explorer:</u> • <u>IE6-7</u> %USERPROFILE%\Local Settings\ History\ History.IE5 • <u>IE8-9</u> %USERPROFILE%\AppData\Local\Microsoft\Windows\History\ History.IE5 • <u>IE10-11</u> %USERPROFILE%\AppData\Local\Microsoft\Windows\WebCache\WebCacheV*.dat</p> <p>Interpretation:</p> <ul style="list-style-type: none"> • Stored in index.dat as: file:///C:/directory/filename.ext • Does not mean file was opened in browser 	<p>Shell Bags</p> <p>Description: • Which folders were accessed on the local machine, the network, and/or removable devices. Evidence of previously existing folders after deletion/overwrite. When certain folders were accessed.</p> <p>Location: <u>Explorer Access</u> • USRCLASS.DAT\Local Settings\Software\Microsoft\Windows\ Shell\Bags • USRCLASS.DAT\Local Settings\Software\Microsoft\Windows\ Shell\BagMRU <u>Desktop Access</u> • NTUSER.DAT\Software\Microsoft\Windows\Shell\ BagMRU • NTUSER.DAT\Software\Microsoft\Windows\ Shell\Bags</p> <p>Interpretation: Stores information about which folders were most recently browsed by the user.</p>	<p>Last-Visited MRU</p> <p>Description: Tracks the specific executable used by an application to open the files documented in the OpenSaveMRU key. In addition, each value also tracks the directory location for the last file that was accessed by that application.</p> <p>Example: Notepad.exe was last run using the C:\Users\Rob\Desktop folder</p> <p>Location: <u>XP</u> NTUSER.DAT\Software\Microsoft\Windows\CurrentVersion\Explorer\ComDlg32\ LastVisitedMRU <u>Win7/8/10</u> NTUSER.DAT\Software\Microsoft\Windows\CurrentVersion\Explorer\ComDlg32\ LastVisitedPidlMRU</p> <p>Interpretation: Tracks the application executables used to open files in OpenSaveMRU and the last file path used.</p>
<p>Jump Lists</p> <p>Description: • The Windows 7 task bar (Jump List) is engineered to allow users to “jump” or access items have frequently or recently used quickly and easily. This functionality cannot only include recent media files; it must also include recent tasks. • The data stored in the AutomaticDestinations folder will each have a unique file prepended with the AppID of the association application and embedded with LNK files in each stream.</p> <p>Location: <u>Win7/8/10</u> C:\%USERPROFILE%\AppData\Roaming\Microsoft\Windows\Recent\AutomaticDestinations</p> <p>Interpretation:</p> <ul style="list-style-type: none"> • Using the Structured Storage Viewer, open up one of the AutomaticDestination jumplist files. • Each one of these files is a separate LNK file. They are also stored numerically in order from the earliest one (usually 1) to the most recent (largest integer value). 	<p>Office Recent Files</p> <p>Description: MS Office programs will track their own Recent Files list to make it easier for users to remember the last file they were editing.</p> <p>Location: NTUSER.DAT\Software\Microsoft\Office\VERSION • 14.0 = Office 2010 • 12.0 = Office 2007 • 11.0 = Office 2003 • 10.0 = Office XP</p> <p>NTUSER.DAT\Software\Microsoft\Office\VERSION\ UserMRU\LiveID_####\FileMRU • 15.0 = Office 365</p> <p>Interpretation: Similar to the Recent Files, this will track the last files that were opened by each MS Office application. The last entry added, per the MRU, will be the time the last file was opened by a specific MS Office application.</p>	<p>Prefetch</p> <p>Description: • Increases performance of a system by pre-loading code pages of commonly used applications. Cache Manager monitors all files and directories referenced for each application or process and maps them into a .pf file. Utilized to know an application was executed on a system. • Limited to 128 files on XP and Win7 • Limited to 1024 files on Win8-10 • (exename)-(hash).pf</p> <p>Location: <u>WinXP/7/8/10</u> C:\Windows\Prefetch</p> <p>Interpretation:</p> <ul style="list-style-type: none"> • Can examine each .pf file to look for file handles recently used • Can examine each .pf file to look for device handles recently used

Windows Artifact Analysis: Evidence of... Deleted File or File Knowledge

<p>XP Search – ACMRU</p> <p>Description: You can search for a wide range of information through the search assistant on a Windows XP machine. The search assistant will remember a user's search terms for filenames, computers, or words that are inside a file. This is an example of where you can find the "Search History" on the Windows system.</p> <p>Location: <u>NTUSER.DAT HIVE</u> NTUSER.DAT\Software\Microsoft\Search Assistant\ACMRu\####</p> <p>Interpretation:</p> <ul style="list-style-type: none"> • Search the Internet – ####=5001 • All or part of a document name – ####=5603 • A word or phrase in a file – ####=5604 • Printers, Computers and People – ####=5647 	<p>Last-Visited MRU</p> <p>Description: Tracks the specific executable used by an application to open the files documented in the OpenSaveMRU key. In addition, each value also tracks the directory location for the last file that was accessed by that application.</p> <p>Location: <u>XP</u> NTUSER.DAT\Software\Microsoft\Windows\CurrentVersion\Explorer\ComDlg32\LastVisitedMRU</p> <p><u>Win7/8/10</u> NTUSER.DAT\Software\Microsoft\Windows\CurrentVersion\Explorer\ComDlg32\LastVisitedPidlMRU</p> <p>Interpretation: Tracks the application executables used to open files in OpenSaveMRU and the last file path used.</p>	<p>Win7/8/10 Recycle Bin</p> <p>Description: The recycle bin is a very important location on a Windows file system to understand. It can help you when accomplishing a forensic investigation, as every file that is deleted from a Windows recycle bin aware program is generally first put in the recycle bin.</p> <p>Location: <u>Hidden System Folder</u> <u>Win7/8/10</u></p> <ul style="list-style-type: none"> • C:\\$Recycle.bin • Deleted Time and Original Filename contained in separate files for each deleted recovery file <p>Interpretation:</p> <ul style="list-style-type: none"> • SID can be mapped to user via Registry Analysis • Win7/8/10 - Files Preceded by \$I##### files contain • Original PATH and name • Deletion Date/Time - Files Preceded by \$R##### files contain • Recovery Data
<p>XP Recycle Bin</p> <p>Description: The recycle bin is a very important location on a Windows file system to understand. It can help you when accomplishing a forensic investigation, as every file that is deleted from a Windows recycle bin aware program is generally first put in the recycle bin.</p> <p>Location: <u>Hidden System Folder</u> <u>Windows XP</u></p> <ul style="list-style-type: none"> • C:\RECYCLER\2000\NT\XP\2003 • Subfolder is created with user's SID • Hidden file in directory called "INFO2" • INFO2 Contains Deleted Time and Original Filename • Filename in both ASCII and UNICODE <p>Interpretation:</p> <ul style="list-style-type: none"> • SID can be mapped to user via Registry Analysis • Maps file name to the actual name and path it was deleted from 	<p>Thumbs.db</p> <p>Description: Hidden file in directory where images on machine exist stored in a smaller thumbnail graphics. thumbs.db catalogs pictures in a folder and stores a copy of the thumbnail even if the pictures were deleted.</p> <p>Location: <u>WinXP/Win8/1</u> Automatically created anywhere with homegroup enabled</p> <p><u>Win7/10</u> Automatically created anywhere and accessed via a UNC Path (local or remote)</p> <p>Interpretation: Include:</p> <ul style="list-style-type: none"> • Thumbnail Picture of Original Picture • Document Thumbnail – Even if Deleted • Last Modification Time (XP Only) • Original Filename (XP Only) 	<p>Thumbscache</p> <p>Description: Thumbnails of pictures, office documents, and folders exist in a database called the thumbscache. Each user will have their own database based on the thumbnail sizes viewed by the user (small, medium, large, and extra-large)</p> <p>Location: C:\%USERPROFILE%\AppData\Local\Microsoft\Windows\Explorer</p> <p>Interpretation:</p> <ul style="list-style-type: none"> • These are created when a user switches a folder to thumbnail mode or views pictures via a slide show. As it were, our thumbs are now stored in separate database files. Win7+ has 4 sizes for thumbnails and the files in the cache folder reflect this: - 32 -> small - 96 -> medium - 256 -> large - 1024 -> extra large • The thumbscache will store the thumbnail copy of the picture based on the thumbnail size in the content of the equivalent database file.
<p>IE Edge file://</p> <p>Description: A little-known fact about the IE History is that the information stored in the history files is not just related to Internet browsing. The history also records local and remote (via network shares) file access, giving us an excellent means for determining which files and applications were accessed on the system, day by day.</p> <p>Location: <u>Internet Explorer:</u> <u>IE6-7</u> %USERPROFILE%\LocalSettings\History\History.IE5</p> <p><u>IE8-9</u> %USERPROFILE%\AppData\Local\Microsoft\WindowsHistory\History.IE5</p> <p><u>IE10-11</u> %USERPROFILE%\AppData\Local\Microsoft\Windows\WebCache\WebCacheV*.dat</p> <p>Interpretation:</p> <ul style="list-style-type: none"> • Stored in index.dat as: file:///C:/directory/filename.ext • Does not mean file was opened in browser 	<p>Search – WordWheelQuery</p> <p>Description: Keywords searched for from the START menu bar on a Windows 7 machine.</p> <p>Location: <u>Win7/8/10 NTUSER.DAT Hive</u> NTUSER.DAT\Software\Microsoft\Windows\CurrentVersion\Explorer\WordWheelQuery</p> <p>Interpretation: Keywords are added in Unicode and listed in temporal order in an MRUlist</p>

Windows Artifact Analysis: Evidence of... Browser Usage

History

Description:

Records websites visited by date and time.
Details stored for each local user account.
Records number of times visited (frequency).
Also tracks access of local system files.

Location:

Internet Explorer

• IE6-7

%USERPROFILE%\Local Settings\History\History.IE5

• IE8-9

%USERPROFILE%\AppData\Local\Microsoft\Windows\History\History.IE5

• IE10,11,Edge

%USERPROFILE%\AppData\Local\Microsoft\Windows\WebCache\WebCacheV*.dat

Firefox

• XP

%USERPROFILE%\Application Data\Mozilla\Firefox\Profiles\<random text>.default\places.sqlite

• Win7/8/10

%USERPROFILE%\AppData\Roaming\Mozilla\Firefox\Profiles\<random text>.default\places.sqlite

Chrome

• XP

• Win7/8/10

%USERPROFILE%\AppData\Local\Google\Chrome\User Data\Default\History

Google Analytics Cookies

Description:

Google Analytics (GA) has developed an extremely sophisticated methodology for tracking site visits, user activity, and paid search. Since GA is largely free, it has a commanding share of the market, estimated at over 80% of sites using traffic analysis and over 50% of all sites.

__utma – Unique visitors

- Domain Hash
- Visitor ID
- Cookie Creation Time
- Time of 2nd most recent visit
- Time of most recent visit
- Number of visits

__utmz – Traffic sources

- Domain Hash
- Last Update time
- Number of visits
- Number of different types of visits
- Source used to access site
- Google Adwords campaign name
- Access Method (organic, referral, cpc, email, direct)
- Keyword used to find site (non-SSL only)

__utmb – Session tracking

- Domain hash
- Page views in current session
- Outbound link clicks
- Time current session started

Cache

Description:

- The cache is where web page components can be stored locally to speed up subsequent visits
- Gives the investigator a “snapshot in time” of what a user was looking at online
- Identifies websites which were visited
- Provides the actual files the user viewed on a given website
- Cached files are tied to a specific local user account
- Timestamps show when the site was first saved and last viewed

Location:

Internet Explorer

• IE8-9

%USERPROFILE%\AppData\Local\Microsoft\Windows\Temporary Internet Files\Content.IE5

• IE10

%USERPROFILE%\AppData\Local\Microsoft\Windows\Temporary Internet Files\Content.IE5

• IE11

• XP

%USERPROFILE%\Local Settings\Application Data\Mozilla\Firefox\Profiles\<randomtext>.default\Cache

• Win7/8/10

%USERPROFILE%\AppData\Local\Mozilla\Firefox\Profiles\<randomtext>.default\Cache

Chrome

• XP

%USERPROFILE%\Local Settings\Application Data\Google\Chrome\User Data\Default\Cache
- data_# and f_#####

• Win7/8/10

%USERPROFILE%\AppData\Local\Google\Chrome\User Data\Default\Cache\ - data_# and f_#####

Flash & Super Cookies

Description:

Local Stored Objects (LSOs), or Flash Cookies, have become ubiquitous on most systems due to the extremely high penetration of Flash applications across the Internet. They tend to be much more persistent because they do not expire, and there is no built-in mechanism within the browser to remove them. In fact, many sites have begun using LSOs for their tracking mechanisms because they rarely get cleared like traditional cookies.

Location:

Win7/8/10

%APPDATA%\Roaming\Macromedia\FlashPlayer\#SharedObjects\<randomprofileid>

Interpretation:

- Websites visited
- User account used to visit the site
- When cookie was created and last accessed

Cookies

Description:

Cookies give insight into what websites have been visited and what activities may have taken place there.

Location:

Internet Explorer

• IE8-9

%USERPROFILE%\AppData\Roaming\Microsoft\Windows\Cookies

• IE10

%USERPROFILE%\AppData\Roaming\Microsoft\Windows\Cookies

• IE11

%USERPROFILE%\AppData\Local\Microsoft\Windows\INETCookies

• Edge

%USERPROFILE%\AppData\Local\Packages\microsoft.microsoftedge_<APPID>\AC\MicrosoftEdge\Cookies

Firefox

• XP

%USERPROFILE%\Application Data\Mozilla\Firefox\Profiles\<random text>.default\cookies.sqlite

• Win7/8/10

%USERPROFILE%\AppData\Roaming\Mozilla\Firefox\Profiles\<randomtext>.default\cookies.sqlite

Chrome

• XP

%USERPROFILE%\Local Settings\Application Data\Google\Chrome\User Data\Default\Local Storage\

• Win7/8/10

%USERPROFILE%\AppData\Local\Google\Chrome\User Data\Default\Local Storage\

Session Restore

Description:

Automatic Crash Recovery features built into the browser.

Location:

Internet Explorer

• Win7/8/10

%USERPROFILE%\AppData\Local\Microsoft\Internet Explorer\Recovery

Firefox

• Win7/8/10

%USERPROFILE%\AppData\Roaming\Mozilla\Firefox\Profiles\<randomtext>.default\sessionstore.js

Chrome

• Win7/8/10

%USERPROFILE%\AppData\Local\Google\Chrome\User Data\Default\Files =
Current Session, Current Tabs, Last Session, Last Tabs

Interpretation:

- Historical websites viewed in each tab
- Referring websites
- Time session ended
- Modified time of .dat files in LastActive folder
- Time each tab opened (only when crash occurred)
- Creation time of .dat files in Active folder
